## Evolución

Tras más de dos décadas de experiencia en el diseño, desarrollo y fabricación de artículos de iluminación técnica y decorativa para marcas líderes del mercado, alrededor del año 2015, iniciamos la fundación de nuestra propia marca comercial. Esta marca se distingue por ofrecer soluciones de iluminación más avanzadas en el mercado y por su constante innovación en este sector: YLD Lighting Manufacturer S.A.

En 2016, YLD comenzó sus operaciones en España como sede central para Europa y un centro logístico estratégico, teniendo como objetivo establecernos en el mercado español y seleccionar cuidadosamente los productos. Desde aquí, iniciamos el proceso de expansión de la marca al mismo tiempo que continuamos con nuestras operaciones de fabricación personalizada para diversas marcas, tanto a nivel nacional como internacional.

Durante estos años, hemos participado en numerosas ferias nacionales e internacionales, destacando nuestra presencia en eventos clave como Matelec Madrid, Habitat Valencia, Construmat Barcelona, Lighting Days Lyon, Rebuild Madrid, Light + Building Frankfurt, y en las prestigiosas Building Technology Guangzhou y Light + Building Hong Kong. Este constante compromiso nos ha permitido consolidar la marca YLD en España y en parte de Europa, siendo reconocidos por la calidad, fiabilidad y atención excepcional que ofrecemos a nuestros clientes.

Nuestro objetivo de implantación a nivel internacional sigue su curso y confiamos en seguir forjando alianzas decisivas con distribuidores oficiales de la firma, además de abrir nuevas delegaciones propias en aquellos países donde la firma busca establecerse.

Continuamos avanzando en la evolución de nuestra línea de productos, ampliando nuestras capacidades de producción en iluminación técnica, decorativa, industrial y vial. Utilizamos exclusivamente componentes de las marcas más respetadas en el mercado, garantizando así la calidad de nuestros productos. Además, mantenemos un compromiso constante con la mejora de nuestros procesos de investigación, desarrollo, innovación, producción, logística y distribución.

En YLD, nuestra dedicación hacia la excelencia y la satisfacción del cliente nos impulsa a seguir adelante con determinación y pasión, siempre con la mirada puesta en el futuro y en ofrecer soluciones de iluminación de vanguardia.

## Evolution

After more than two decades of experience in the design, development, and manufacturing of technical and decorative lighting fixtures for leading brands in the market, around the year 2015, we began laying the groundwork for our own commercial brand. This brand is distinguished by offering more advanced lighting solutions in the market and by its constant innovation in this sector: YLD Lighting Manufacturer S.A.

In 2016, YLD began its operations in Spain as the headquarters for Europe and a strategic logistics center, aiming to establish ourselves in the Spanish market and carefully select products. From here, we initiated the brand expansion process while continuing our custom manufacturing operations for various brands, both nationally and internationally.

During these years, we have participated in numerous national and international fairs, highlighting our presence at key events such as Matelec Madrid, Habitat Valencia, Construmat Barcelona, Lighting Days Lyon, Rebuild Madrid, Light + Building Frankfurt, and prestigious events like Building Technology Guangzhou and Light + Building Hong Kong. This constant commitment has allowed us to consolidate the YLD brand in Spain and parts of Europe, recognized for the quality, reliability, and exceptional service we offer to our customers.

Our international implementation objective is progressing, and we trust in continuing to forge decisive partnerships with official distributors of the firm, as well as opening new own branches in those countries where the firm seeks to establish itself.

We continue to advance in the evolution of our product line, expanding our production capabilities in technical, decorative, industrial, and street lighting. We exclusively use components from the most respected brands in the market, thus ensuring the quality of our products. Additionally, we maintain a constant commitment to improving our processes of research, development, innovation, production, logistics, and distribution.

At YLD, our dedication to excellence and customer satisfaction drives us to move forward with determination and passion, always with an eye on the future and offering cutting-edge lighting solutions.

*Après plus de deux décennies d'expérience dans la conception, le développement et la fabrication d'articles d'éclairage technique et décoratif pour les principales marques du marché, vers l'année 2015, nous avons commencé à établir notre propre marque commerciale. Cette marque se distingue par ses solutions d'éclairage plus avancées sur le marché et par son innovation constante dans ce secteur : YLD Lighting Manufacturer S.A.*

*En 2016, YLD a démarré ses opérations en Espagne en tant que siège central pour l'Europe et un centre logistique stratégique, dans le but de nous implanter sur le marché espagnol et de sélectionner soigneusement les produits. À partir de là, nous avons entamé le processus d'expansion de la marque tout en poursuivant nos opérations de fabrication personnalisée pour diverses marques, tant au niveau national qu'international.*

*Au cours de ces années, nous avons participé à de nombreuses foires nationales et internationales, soulignant notre présence lors d'événements clés tels que Matelec Madrid, Habitat Valencia, Construmat Barcelona, Lighting Days Lyon, Rebuild Madrid, Light + Building Frankfurt, ainsi que lors de prestigieux événements comme Building Technology Guangzhou et Light + Building Hong Kong. Cet engagement constant nous a permis de consolider la marque YLD en Espagne et en partie en Europe, reconnue pour la qualité, la fiabilité et le service exceptionnel que nous offrons à nos clients.*

*Notre objectif d'implantation au niveau international suit son cours et nous avons confiance en notre capacité à continuer à forger des partenariats décisifs avec les distributeurs officiels de la société, ainsi qu'à ouvrir de nouvelles succursales dans les pays où la société cherche à s'établir.*

*Nous continuons à progresser dans l'évolution de notre gamme de produits, en élargissant nos capacités de production dans l'éclairage technique, décoratif, industriel et routier. Nous utilisons exclusivement des composants des marques les plus respectées sur le marché, garantissant ainsi la qualité de nos produits. De plus, nous maintenons un engagement constant envers l'amélioration de nos processus de recherche, développement, innovation, production, logistique et distribution.*

*Chez YLD, notre dévouement à l'excellence et à la satisfaction du client nous pousse à avancer avec détermination et passion, toujours tournés vers l'avenir et offrant des solutions d'éclairage de pointe.*

# La Temperatura de Color

La temperatura de color se refiere a la predominancia de ciertos colores del espectro lumínico en la luz blanca, lo que puede modificarla hacia tonos cálidos, como el amarillo-anaranjado, o hacia tonos fríos, como el azul. Se mide en grados Kelvin.

En el ámbito de la iluminación LED, se destacan diversas dominantes de color, que van desde tonalidades anaranjadas hasta azules, clasificándolas en tres categorías diferentes: luz cálida, luz blanca y luz fría. Mientras que los tonos cálidos evocan sensaciones de confort, relajación y calidez, los tonos blancos y fríos sugieren dinamismo, limpieza y frescura, entre otras cualidades. Los tonos blancos son los más similares a la luz natural.

# Que es el IP. Grados de Protección

La normativa conocida como International Protection o IP se emplea para establecer los niveles de protección de los productos LED.

Esta normativa, y por ende, la numeración IP, debe aparecer siempre en este tipo de productos para indicar su grado de protección contra agentes externos, ya sean líquidos o sólidos.

Los grados de protección IP determinan lo siguiente:

- Protección para las personas.
- Protección para los dispositivos de iluminación y equipos eléctricos contra la entrada de objetos sólidos, como el polvo.
- Protección para las instalaciones de luz contra los efectos dañinos del agua.

Por lo general, estos productos deben operar de forma segura durante largos períodos y en condiciones ambientales adversas. Por eso, es fundamental establecer una codificación para identificar cuál producto es el más adecuado para cada instalación.

La normativa establece la siguiente codificación:

Un código IP consta de las letras "IP" seguidas de dos dígitos. El primer dígito varía del 0 al 6 y el segundo, del 0 al 9.

- Las letras "IP" identifican el estándar (del inglés: International Protection).

- El valor del primer dígito indica el nivel de protección contra el polvo.

- El valor del segundo dígito indica el nivel de protección contra líquidos, generalmente agua.

Como regla general, se puede afirmar que a mayor grado de protección IP, mayor es la protección del equipo.

## PRIMER DÍGITO. PROTECCIÓN IP CONTRA OBJETOS Y SUCIEDAD

- 0 Sin protección contra el contacto, sin protección contra cuerpos extraños
- 1 Protección contra cuerpos extraños con diámetro >50mm
- 2 Protección contra cuerpos extraños con diámetro >12mm
- 3 Protección contra cuerpos extraños con diámetro >2,5mm
- 4 Protección contra cuerpos extraños con diámetro >1mm
- 5 Protección completa contra contacto, protección contra sedimentaciones de polvos en el interior
- 6 Protección completa contra contacto, protección contra penetración de polvo

## SEGUNDO DÍGITO. PROTECCIÓN IP CONTRA AGUA Y HUMEDAD

- 0 Sin protección contra agua
- 1 Protegido contra gotas de agua que caen verticalmente
- 2 Protegido contra gotas de agua que caen inclinado (15° respecto de la vertical)
- 3 Protegido contra agua pulverizada (hasta 60° respecto de la vertical)
- 4 Protegido contra agua pulverizada
- 5 Protegido contra los chorros de agua (desde todas las direcciones)
- 6 Protegido contra la penetración de agua en caso de inyección pasajera
- 7 Protegido contra la penetración de agua sumergiéndolo
- 8 Protegido contra la penetración de agua sumergiéndolo por un período indefinido
- 9 Protegido contra la penetración de agua de todas direcciones también en caso de una presión alta contra el chasis. (limpiadora de alta presión o de chorro de vapor, 80-100 bar)

IP21: Protección contra cuerpos extraños con diámetro >12mm y protegido contra gotas de agua que caen verticalmente
